Class X (Secured 72%)

06/2018 – 04/2019  
Karwar, Karnataka,  
India

## PROJECTS

### Agriculture Management System

SQL, PHP, HTML

10/2023

- Launched a data-driven agriculture management platform that improved coordination of farming resources, enabling precise allocation and tracking of 100+ agricultural assets, leading to minimized resource shortages and overages.

### SPACE SHOOTER GAME

C++, OpenGL

06/2024

- Engineered a Space Shooter Game: Developed a dynamic space shooter game using C++ and OpenGL, implementing realtime 2D graphics rendering and handling game logic to deliver a smooth and engaging gaming experience.

### College ERP Management System

Python, Django framework

08/2024

- Developed a Comprehensive College Management System: Designed and implemented a web-based College Management System using Django, allowing for streamlined management of student records, faculty details, course registrations, and grade tracking.

## TECHNICAL SKILLS
